- f Forecast
- Rv Revised value
- e Less than half the unit used
- (R) Data rectified by the relevant body
- s Estimated value

Share of individuals having at least basic digital skills by sex (%)

Geographical coverage	Europe (EU27 (2020), EU28, EA19, DE, AT, BE, BG, CY, HR, DK, SK, SI, ES, EE, FI, FR, GR, HU, IE, IT, LV, LT, LU, MT, NL, PL, PT, CZ, RO, SE, IS, NO, UK, CH)
Statistical operation:	Community survey on ICT usage in households and by individuals.
Type of statistical operation:	Sample survey
Period or moment of reference:	3 months prior to the survey or 12 months prior to the survey
Frequency:	Annual
Responsible entity:	Eurostat National Entities
Notes:	<p>The data corresponds to the figures published on the Eurostat portal, on the access date referred to in the metadata. Data can be rectified by the body responsible without any indication given. For reasons beyond Pordata's control, inconsistencies between the totals and the sum of the parts as well as between the figures of different tables may also occur.</p> <p>This indicator measures the share of people aged 16 to 74 having at least basic digital skills, which is one of the four levels of the overall digital skills indicator: no skills, low level of skills, basic level of skills and above basic level of skills. Digital skills indicator is a composite indicator based on selected activities performed by individuals on the internet in the four specific areas: information, communication, problem solving and software skills for content manipulation.</p>
